

Adem Sahbeni

27565322 | sahbani.adem@esprit.tn | Bizerte, Tunisia

EDUCATION

ESPRIT – School of Engineering <i>Engineering Degree in Computer Science – 2nd year</i>	Tunis, Tunisia 2024 – Present
Faculty of Sciences of Bizerte <i>Bachelor's Degree in Information and Communication Technology – Highest Honors</i>	Bizerte, Tunisia 2021 – 2024

EXPERIENCE

VNEXT Consulting <i>Software Developer Intern</i> - Designed and developed dynamic user interfaces for web applications. - Conducted user needs analysis by identifying objectives and constraints to produce technical specifications. - Implemented front-end features and managed relational data with MySQL.	Bizerte, Tunisia Jun. 2024 – Aug. 2024
YAZAKI <i>End-of-Study Intern</i> - Automated production machine processes using an API, improving operational efficiency. - Implemented real-time monitoring with automated email notifications for process tracking. - Authored a technical internship report documenting the project context and skills developed.	Bizerte, Tunisia Feb. 2024 – May 2024
Tunisie Telecom <i>Observation Intern</i> Assisted the supervisor in day-to-day technical and operational missions.	Bizerte, Tunisia Jan. 2023 – Feb. 2023

PROJECTS

GRinta <i>Spring Boot, Angular, MySQL, Maps API, Payment API, AI/ML</i> - Developed a full-stack sports and nutrition platform enabling users to book courts and gyms, share events, and join live online workouts. - Built a RESTful backend with Spring Boot and a relational MySQL database handling users, reservations, events, and workout sessions. - Implemented an Angular frontend integrating Google Maps API for venue discovery and a payment API for secure transactions. - Integrated AI/ML models to analyze user movements in real time during online workouts and verify correct exercise form.	2026 – Present
OpenStack Cloud Infrastructure <i>OpenStack, Docker, Kubernetes, Heat, Prometheus, Grafana</i> - Designed and deployed a private cloud infrastructure using OpenStack with full network configuration (subnets, routers, security groups, floating IPs). - Orchestrated containerized workloads with Docker and Kubernetes, automating deployment across the OpenStack environment. - Automated infrastructure provisioning using OpenStack Heat templates for repeatable and scalable stack deployments. - Set up a monitoring stack with Prometheus and Grafana to track resource usage, node health, and cluster performance in real time.	2026

TECHNICAL SKILLS

Languages: JavaScript, Java, SQL, HTML/CSS
Frameworks & Tools: Spring Boot, Angular, IntelliJ IDEA, GitHub, MySQL
DevOps & Cloud: Docker, Kubernetes, OpenStack, Heat
Monitoring: Prometheus, Grafana
Soft Skills: Teamwork, Communication, Problem-Solving, Adaptability
